EXPLANATORY NOTES

In General Statement No. 1 (Pt. ii) of Imports and Goods entered for Consumption, The term 'Entered for Consumption' is the technical term in use at the custom-house, and does not imply that the goods have been actually consumed in Canada, but that they have passed into the possession of the importer and that duty has been paid on that portion liable for duty.

The value of goods imported is governed by Section 58 of the Customs Act, which provides that the value of imported goods subject to ad valorem duty 'shall be the fair market value thereof, when sold for home consumption, in the principal markets of the country whence and at the time when the same were exported directly to Canada.'

In General Statement No. 3 (Pt. ii) of Exports, The term 'The Produce of Canada' includes all imported articles which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined in Canada from imported raw sugar, flour ground from imported wheat, and articles constructed or manufactured from imported materials.

'Goods not the produce of Canada' shows the exports of foreign goods which had been previously imported.

Under the Regulations commencing July 1st, 1900, all *Export* entries are delivered at the '*frontier port of exit*,' and the totals thereof are credited to the respective ports where the goods pass outwards from Canada. In view of the more complete returns obtained under this system the additions heretofore made to the export statistics (prior to July 1st, 1900) under the head of 'Short returns' are now omitted.

In this report, the tables of imports and exports at the several ports of entry indicate that merchandise of the value stated was *entered inwards* or *passed outwards* at the ports mentioned, but do not imply that the imports were all for consumption at such ports or that the exports originated there.

The trade by Countries, with the Dominion as a whole, is recorded in the General Statements of Imports and Exports.

The value of 'Goods the Produce of Canada' is their value at the time of exportation at the ports of Canada whence shipped.

The value of 'Goods not the Produce of Canada' is the actual cost of such goods.

The initals N.E.S. mean 'not elsewhere specified.'

" N.O.P. mean 'not otherwise provided for.'

The expression 'Ton' means two thousand pounds, and 'Cwt.' one hundred pounds.

" 'Standard hundred' when applied to deals, means 2,750 feet board measure.

" 'Ton,' applied to square timber, means 40 cubic feet.

In the shipping tables the tonnage is given in net tons.

SPECIAL NOTE.

Under an amendment to the Customs Tariff passed in 1903, provision was made for the collection of a surtax on the goods of any foreign country which treats imports from Canada less favourably than those from other countries.

It is to be particularly noted that the surtax does not apply to the goods of other countries imported from Germany, but only to articles which are the growth, produce or manufacture of Germany. Various classes of goods which are of *other than German origin* therefore appear in these Tables as imports from Germany, entered under the General Tariff and not subject to a surtax.

Since the year 1896–97 the two services of gas and electric light inspection, which are conducted largely by the same staff of officers have reached that point at which they have ceased to be a burden upon the general taxpayer, as shown below :—

Years.	Gas and Electric Light	
	Revenue.	Expenditure.
	$ cts.	$ cts.

* Exclusive of cost of standard instruments.

The kindred service of weights and measures inspection, it will be observed, earns slightly over 70 per cent of its actual cost, the expenditure as already stated having been $90,875.87 against a revenue of $65,088.33.

Sample sets of metric weights and measures are still being supplied to educational institutions throughout the country. Up to the present time nearly 500 of these sets have been sent out from the Department.

I have the honour to be, sir,

Your obedient servant,

W. J. GERALD,
Deputy Minister.

The following statement shows the total number of samples examined during the fiscal year ended June 30, 1902, 1903, 1904 and 1905 respectively :—

The Department has decided that, as respects the purity of its food supplies, the public of Canada shall be protected ; and as the manufacturers and the trade generally have been sufficiently warned they must be prepared for a vigorous administration of the provisions of the ' Adulteration Act. '

Many dealers complain that they are unable to determine whether or not goods purchased by them are unadulterated and that in consequence they are made to suffer unjustly.

The remedy for this condition of affairs rests with the dealers themselves as they have only to secure from the manufacturer or wholesale dealer, from whom their supplies are obtained, the warranty that the goods furnished are pure and unadulterated. With this in their possession the Department is enabled to bring the manufacturer, or wholesale dealer, into the case and inflict punishment where such belongs.

I have the honour to be, sir,
Your obedient servant,

W. J. GERALD,
Deputy Minister.

Inland Revenue Department,
Ottawa, December 21, 1905.

APPENDIX E.

BULLETIN No. 101.—STANDARD FERTILIZERS, 1905.

Ottawa, 7th April, 1905.

Wm. Himsworth, Esq.,
Acting Deputy Minister of Inland Revenue.

Sir,—I beg to submit the result of analysing 117 standard samples of fertilizers, which, in accordance with the provisions of the Fertilizers Act, 1890, were sent to the Minister of Inland Revenue as representing the goods which the manufacturers propose to offer for sale in the Dominion during the present year. These samples should, according to the Act, be sent in before the end of the month of January in each year, but it was not until about the middle of March, 1905, that the last of them were received. The following is a statement of the number of such standard samples which have been submitted to this Branch during the past nine years :—

In 1897	there were	analysed	107 samples.
1898	"	124	"
1898	"	154	"
1900	"	107	"
1901	"	102	"
1902	"	106	"
1903	"	128	"
1904	"	111	"
1905	"	120	"

The tabulated statement appended to this report gives the designations of the various brands of fertilizers, the names of the manufacturers or importers, the claims made as regards their fertilizing constituents, and the actual percentage of these found in the standard samples on analysis in this laboratory. The guaranteed contents must be understood to indicate only the lowest percentages claimed on the manufacturer's label or given in his correspondence with the Department.

As required by the Fertilizers Act, the tabulated statement contains also a column in which the relative value per 2,000 lbs. of each fertilizer is given, calculated from their contents in fertilizing ingredients, the values of these being taken as follows :—

	Cents per lb.
Nitrogen in salts of ammonia or in nitrates, as well as in compound fertilizers	17
Organic nitrogen in ground bone, fish, blood or tankage	16
Phosphoric acid :—	
Soluble in water	6
Soluble in 1 p.c. citric acid	5½
Insoluble in Thomas phosphate powder	3½
Insoluble in ground rock, phosphate, and fertilizers generally	1½
Potash in high grade salts	5

These rates have this year been modified in order to bring them to correspond more closely with the present commercial prices of the materials used in the manufacture of fertilizers. The valuation of each brand is calculated on the results of the analysis of the standard samples, but it has been omitted in the case of the guaranteed contents on account of the imperfect character of the information supplied in the majority of instances.

I beg to recommend the immediate publication of this report, and in advance of the one to be issued regarding 'Fertilizers as sold.'

I have the honour to be, sir,
Your obedient servant,

THOMAS MACFARLANE,
Chief Analyst.

APPENDIX F.

BULLETIN No 102—MAPLE SYRUP AND SUGAR.

OTTAWA, June 6, 1905.

W. J. GERALD, Esq.,
Deputy Minister of Inland Revenue.

SIR,—On the 1st February last, I received instructions to cause samples of maple syrups and sugars to be obtained and analysed. Subsequently it was decided that two collections of these should be made : one previous to the maple sugar season in the spring of this year, and another after the produce of that season had been placed on the market. The particulars regarding the origin of these samples and the result of their examination are given in the accompanying tables I to IV. The details of the analyses are not given, and it is considered sufficient to state that the methods followed were in the main those which have been recommended by Mr. C. H. Jones in the 17th Annual Report of the Vermont Agricultural Experiment Station, 1903-4.

The samples on examination yielded results which cause them to be classified as follows :—

Collection.	Table.	Genuine.	Doubtful.	Adulterated.	Total.
First	I.—Syrups.....	17	4	76	97
do	II.—Sugars.....	12	2	8	22
Second	III.—Syrups.....	44	2	29	75
do	IV.—Sugars.....	15	0	3	18
		88	8	116	212

From these figures it follows that in the first collection only 24·3 per cent of the samples were found to be genuine, whereas in the second collection there was a great improvement 63·4 per cent being found to be genuine.

I beg to recommend the publication of this report.

I have the honour to be, sir,

Your obedient servant,

THOMAS MACFARLANE,
Chief Analyst.

APPENDIX H.

BULLETIN No. 104.—JAMS, MARMALADES AND JELLIES.

OTTAWA, June 15, 1905.

W. J. GERALD, Esq.,
Deputy Minister of Inland Revenue.

SIR,—I have the honour to submit a report upon Jams, Marmalades and Jellies, collected during May, in accordance with instructions contained in File 90179.

Ninety-eight samples have been analyzed in this laboratory; and the numerical results of analysis are contained in the accompanying tables. In addition to the samples analyzed, a sample of *Red Currant* (25561) was broken in transit, and the following numbers, making no claim to be fruit products, were not analyzed:

No. 20292—calvesfoot jelly.
" 22281 }
" 22283 }
" 22285 }
" 22287 } Gelatine package jelly powders.
" 22289 }
" 22290 }
" 24686 }

The samples analyzed are classified as follows:—

Jams—		
Black currant	6	samples
Gooseberry	2	"
Peach	10	"
Plum	10	"
Raspberry	15	"
Strawberry	12	—55
Jellies	14	
Marmalades	29	
Total	98	

Table I gives, as usual, the source of each sample, and a statement of claims made regarding it. Succeeding tables give, in detail, the results of analysis.

I may remark that the column headed 'Residual Cane Sugar' has reference only to that portion of the cane sugar added which is not inverted by the operations of manufacture, and is no indication of the amount of cane sugar originally added. The next column 'Non-Cane Sugar Solids'—contains more or less of the cane sugar, now changed into *invert sugar*, together with glucose, or other matters used in manufacture.

The percentage amount of glucose stated in the 'Remark' column is derived from considerations which are more fully given in Bull. 96 (revised) pp. 18 and 19. As there explained, the quantity of glucose is only approximated, and must not be considered accurate within 5 to 10 per cent. My conclusion as given, is always a conservative one.

The subjoined table gives a synopsis of the results of analysis :—

Articles.	Kind.	Total number of Samples.	Found Genuine.	Containing Glucose.	Containing Preservatives.	Containing Dyes.
Jam	Black currant	6	2	4	3	3
	Gooseberry	2	0	2	0	0
	Peach	10	1	9	1	0
	Plum	10	1	9	1	0
	Raspberry	15	5	10	3	9
	Strawberry	12	3	9	3	6
	Total	55	12	43	11	18
Marmalade		29	13	16	1	3
Jelly		14	8	6	3	8
	Total	98	33	65	15	29

It will be seen that of the total number of samples examined :—

66 per cent contained glucose.
15 " " preservatives.
30 " " dyes.

I have the honour to be, sir,

Your obedient servant,

A. McGILL,
Acting Chief Analyst.

APPENDIX I.

BULLETIN No. 105—FERTILIZERS AS SOLD.

W. J. GERALD, Esq.,
Deputy Minister of Inland Revenue Department.

OTTAWA, August 19, 1905.

DEAR SIR,—I have the honour to present you the results of analysis of 88 samples of Fertilizers, purchased in the open market during the months of April, May and June of this year.

This procedure is in accordance with the terms of Section 5 of the Fertilizers Act, which requires not only that manufacturers, importers or vendors shall furnish standard samples of the brands which they propose to place on the market, but that such action shall not limit the right of the inspector to procure samples for analysis, in accordance with the subsequent provisions of the Act.

The samples now reported may be classified as follows:—

District.	Total inspected.	Genuine.	Below guarantee.	Not registered.	Doubtful.
Nova Scotia	7	4	0	3	0
Prince Edward Island	2	1	0	1	0
New Brunswick	7	4	2	1	0
Quebec	7	7	0	0	0
St. Hyacinthe	10	3	3	2	2
Montreal	15	10	4	0	1
Kingston	10	6	0	4	0
Toronto	12	7	1	3	1
London	10	3	0	7	0
British Columbia	8	5	0	3	0
Total	88	50	10	24	4

The samples whose analysis is now reported, should be directly comparable with one or other of the brands registered in Bulletin 101. Much difficulty has been found in identifying the samples purchased, and the inspectors have in many cases, been uncertain as to identity. Hence it comes that four (4) samples are marked 'doubtful,' and it is quite possible that some of the samples classed as 'not registered' may owe this to imperfect description.

I would suggest that manufacturers and importers, be required to distinguish each brand by a perfectly distinctive name (as is already done by many manufacturers) and that the brand so distinguished should be always sold under its proper name. Such names as 'Potato fertilizer' 'Bone meal' 'Lawn fertilizer,' etc., are too general and permit of much error in comparison with standards. It would also be well, that in buying samples on the open market, the inspector should carry with him a copy of the list of

standard fertilizers registered for the year, and require each vendor to identify the sample sold by him, with a registered brand; failing which, the sample sold by him would of course, fall into the class of unregistered fertilizers.

I beg to recommend that this report be published as Bulletin 105.

I have the honour to be, sir, your obedient servant,

A. McGILL,
Acting Chief Analyst.
